

Bewdley South Signal Box showing some of the signals associated with the Stourport junction. The signals on the right hand bracket control access to Platforms 1 and 3, plus the Rock Siding and Down Goods Yard for trains from Kidderminster, whilst the small bracket on the left of the alignment controls access to Platform 1 and the Down Goods Yard for trains from Stourport. The highest yellow signal is the Bewdley North Up Distant and can be operated By North Signal Box when the home signal is pulled off. The other distant signals are fixed. Photograph By A.Coley
